CIC Port Maps and Data Flow Diagrams

Technical Reference

Abstract

The port map and data flow diagrams illustrate the default ports numbers and protocols used for network connections between workstations, devices, and Interaction Center servers.

For the latest version of this document, see the PureConnect Documentation Library at: <http://help.genesys.com/cic>.

For copyright and trademark information, see https://help.genesys.com/cic/desktop/copyright_and_trademark_information.htm.

Introduction

This document provides diagrams illustrating the default network ports and protocols for data flow between the following entities:

- Workstations, devices, and PureConnect products
- Existing network environment and Customer Interaction Center systems

Note:

This document applies to on-premises installations, not cloud-based hosted services. Most port numbers can be changed during installation and configuration.

In most cases, you can change the default port number during the installation process, or during post-installation configuration. If you do change the default port numbers, you can edit a copy of this document to track your port numbers.

Genesys is not responsible for port assignments required by products, services, and cloud-based services owned by other organizations.

For more information about ports and security, see *Security Precautions in Interaction Center*.

Important points

The following points apply to various port maps in this document and are noted at the top of each port map:

- Ports must remain open for the entire path between named devices.
- If wanted, customize port numbers during installation and configuration.
- Do not change Interaction Edge port numbers.

Data flow

Each connection shows both the port numbers and direction of data flow. Data can flow in one direction or both directions.

Acronyms used in this document

To save space, most common acronyms are not defined in the diagrams. Refer to the following table for acronyms used in this document.

ADFS Active Directory Federation Services

ASR Automatic Speech Recognition

CCS Central Campaign Server

CIC Customer Interaction Center

CRM Customer Relationship Management

DHCP Dynamic Host Control Protocol

DNS Domain Name System

EWS Exchange Web Services

FBMC File Based Mail Connector

FTP File Transfer Protocol

HP ILO Hewlett Packard Integrated Lights-Out

HTTP Hypertext Transfer Protocol

HTTPS Hypertext Transfer Protocol Secure

ICBM Interaction Center Business Manager

ICMP Internet Control Message Protocol

ICON Interaction Conference

IIS Internet Information Services

IKVM Integrated Keyboard Video Mouse

IMAP Internet Message Access Protocol

IMS Interaction Message Store

ION Interactions Over Networks

IP Internet Protocol

IPMI Integrated Port Management Interface

IRRCS Interaction Recorder Remote Content Service

ISR Interaction Speech Recognition

ISS Interaction SIP Station

IWP Interaction Web Portal

LAN Local Area Network

LDAP Lightweight Directory Access Protocol

LDS Lightweight Directory Services

MAPI Messaging Application Programming Interface

MRCP Media Resource Control Protocol

NDMP Network Data Management Protocol

NRPC Notes Remote Procedure Call

NTP Network Time Protocol

ODS Outbound Dialing Server

PSTN Public Switched Telephone Network

RDP Remote Desktop Protocol

RMCP Remote Management and Control Protocol

RTP Real-Time Transport Protocol

SAPI Speech Application Programming Interface

SIP Session Initiation Protocol

SMB Server Message Block

SMTP Simple Mail Transfer Protocol

SNMP Simple Network Management Protocol

SOAP Simple Object Access Protocol

SQL Structured Query Language

TBC Time-Based Corrector

TCP Transmission Control Protocol

TLS Transport Layer Security

TSRA Terminal Services Remote Application

TTL Time To Live

TTS Text-To-Speech

UDP User Datagram Protocol

UDPTL User Datagram Protocol Transport Layer

VNC Virtual Network Computing

VoIP Voice over Internet Protocol

WAN Wide Area Network

XMPP Extensible Messaging and Presence Protocol

Default web interfaces

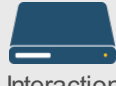

Note:

Ports must remain open for the entire path between named devices.

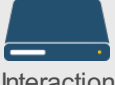

Port numbers can be customized during installation and configuration.

Interaction Edge port numbers cannot be changed.

Interaction Media Server (Packaged Server)

 Client web browser	→		 Interaction Media Server
	HTTP	TCP 8083 /WAN TCP/TLS 446 /WAN	

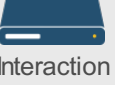

Interaction Media Server (Software Only)

 Client web browser	→		 Interaction Media Server
	HTTP	TCP 8084 /WAN TCP/TLS 443 /WAN	

Interaction SIP Proxy (Software Only)

 Client web browser	→		 Interaction SIP Proxy
	HTTP	TCP 8080 /WAN TCP/TLS 442 /WAN	

Interaction Media Streaming Server

 Client web browser	→		 Interaction Media Streaming Server
	HTTP	TCP 8190 /WAN TCP/TLS 8191 /WAN	

Client operations

Note:

Ports must remain open for the entire path between named devices.

Interaction Desktop - Scheduled Reports - IC Server Manager

 Workstation	→		 CIC Servers
	Notifier	TCP SSL 5597 /WAN TCP TLS 6234 /WAN UDP 6235 /WAN TCP 2633 /WAN	
	Session Manager	TCP 3952 /WAN

Monitoring and Management

Note:

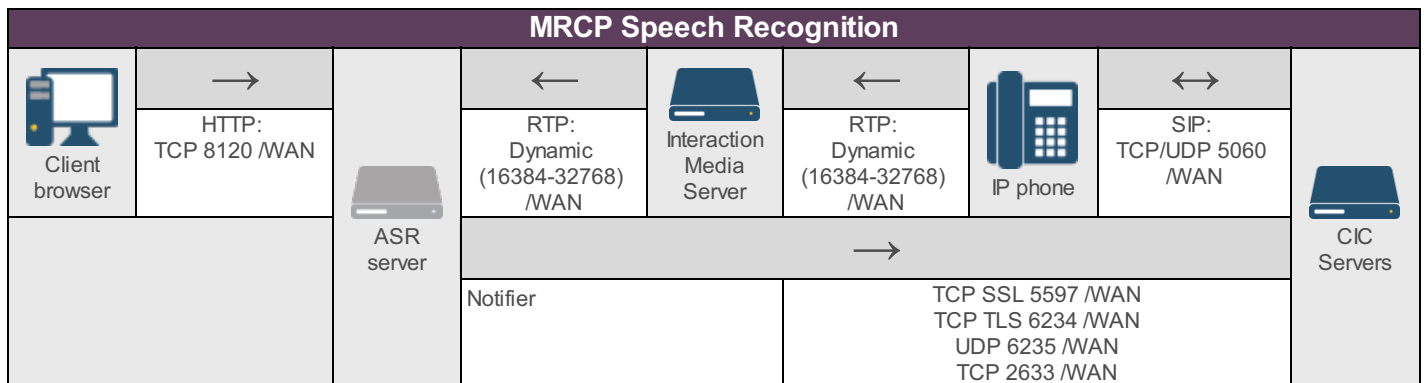

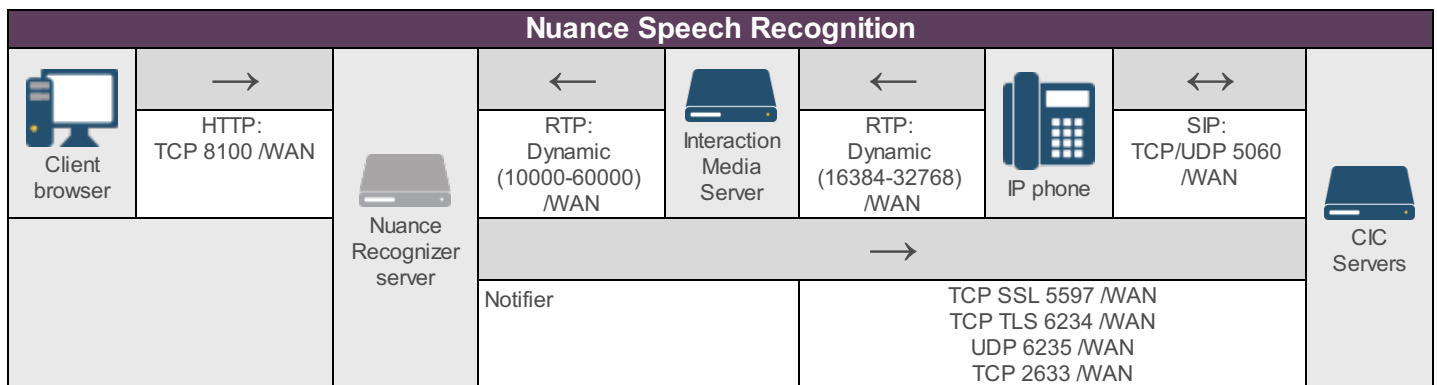

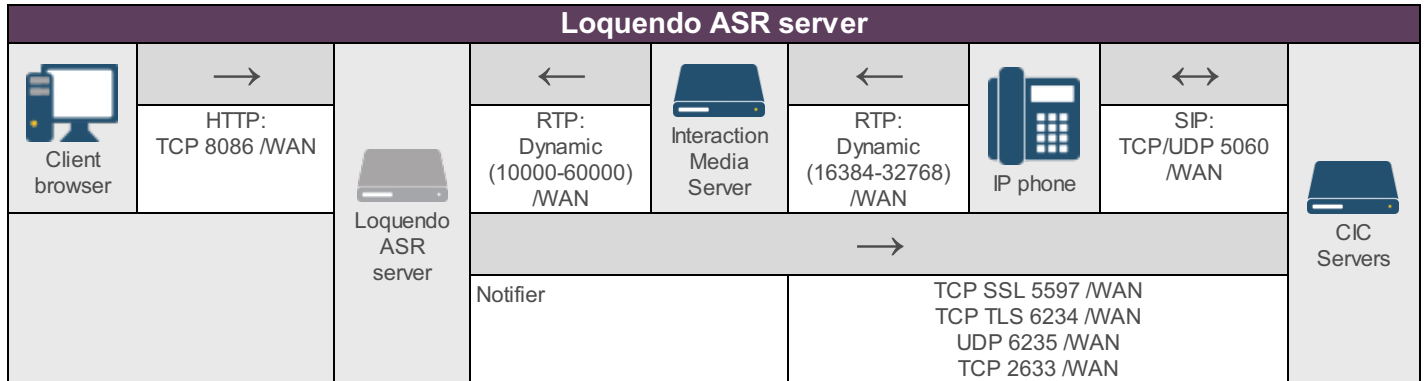

Ports must remain open for the entire path between named devices.

Speech Recognition

Note:

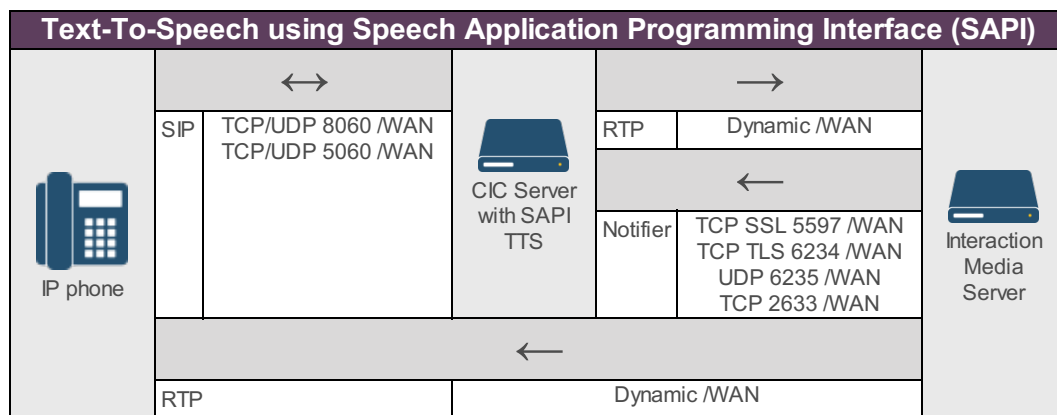

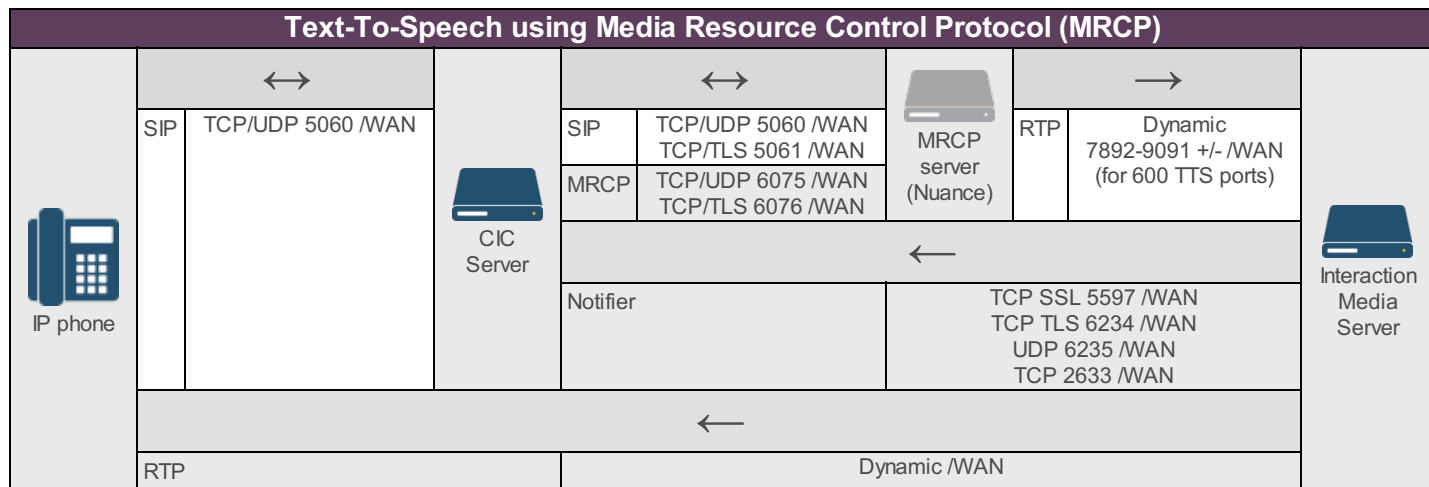

Ports must remain open for the entire path between named devices.

Text-to-Speech

Note:

Ports must remain open for the entire path between named devices.

Audiocodes Ports

Note:

Ports must remain open for the entire path between named devices.

You can customize port numbers during installation and configuration.

 IP phone	→		 Audiocodes gateway	←		 Interaction Media Server
	RTP	Dynamic		Audiocodes	6000-9291	
	Audiocodes	6000-9291				

Single Sign-On

Note:

Ports must remain open for the entire path between named devices.

Single Sign-On: Microsoft AD FS Identity Provider

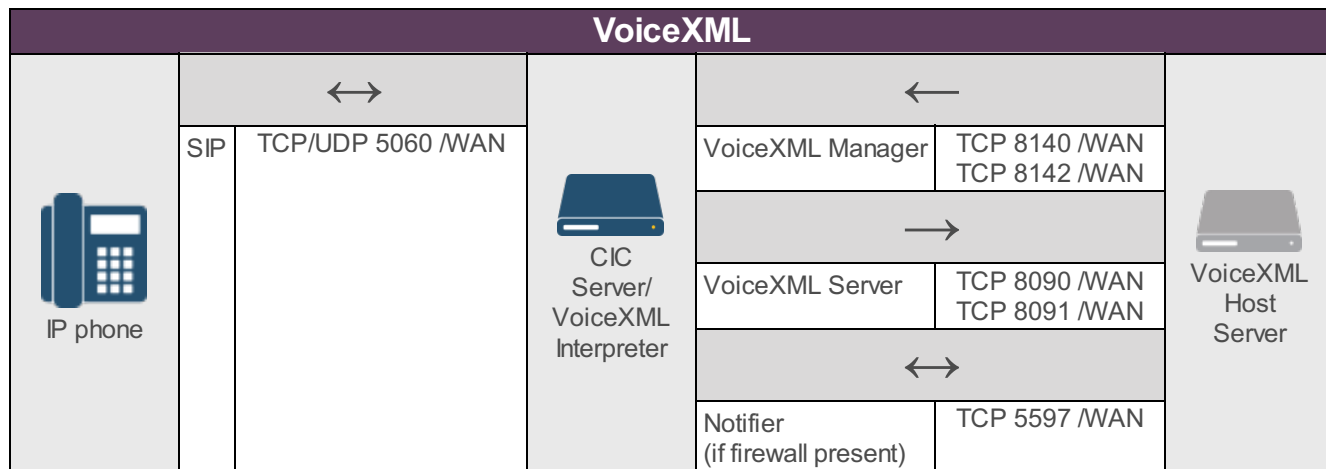

Single Sign-On: Cloud Identity Provider

VoiceXML

Note:

Ports must remain open for the entire path between named devices.

Change Log

Date	Changes
04-September-2019	IC-153485 - Added VoiceXML topic.
24-January-2019	<ul style="list-style-type: none"> ● Changed "TCP 6235" to "UDP 6235" in all diagrams where present. ● Added "TCP TLS 6234 /WAN" to all Notifer protocol entries in all diagrams where present. ● Corrected "TCP 62356" to "UDP 6235" in Interaction Edge topic. ● Added Off-Server Session Manager (OSSM) topic for ease of use.
19-October-2018	<ul style="list-style-type: none"> ● Added a table for Screen Recorder Client in Client operations. ● Added a table for Screen Recorder Client in Interaction Recorder Remote Content Service. ● In Interaction Dialer: <ul style="list-style-type: none"> ○ Added ports and protocols for Switchover and Session Manager between the CIC server and the Central Campaign Server in Interaction Dialer. ○ Changed the direction arrow for "Notifier" between "CIC Servers" and "Central Campaign Server" to be bidirectional. ○ Added a table for Central Campaign Server Switchover. ● In Single Sign-On: <ul style="list-style-type: none"> ○ Removed HTTP TCP 80/8081 between Workstation and Service Provider. ○ Added Session Manager TCP 8019 /WAN between Workstation and Service Provider. ○ Added Secure Token Server TCP 8043 /WAN between Workstation and Service Provider.
03-August-2018	Added "TCP 1434" for "Microsoft SQL" in the Database and CRM and Reports topics.
12-March-2018	<ul style="list-style-type: none"> ● IC-146831 Update Port Map Diagram - Removed SMB connections to "Recording storage" for Interaction Administrator/Designer and Interaction Attendant in Client operations diagram. ● IC-146316 HTTP Web Browser section on page 7 incorrect in port map doc - Changed bidirectional arrow from Workstations to Reverse Proxy to be unidirectional in Client operations diagram. ● IC-145563 Port Map TR issues - <ul style="list-style-type: none"> ○ Changed definitions of HTTP and HTTPS acronyms in Introduction. ○ Changed definition of IIS acronym in Introduction ○ Removed IMAP/SMTP as viable protocols for Microsoft Exchange in Mail Server Integration diagram. ○ Added HTTPS TLS 443 /WAN, SMTP TLS 465 /WAN, and IMAP TLS 993 /WAN for IMAP/SMTP (Gmail) item in Mail Server Integration diagram. Removed previous protocols and ports for Gmail item in Mail Server Integration diagram. ○ Added TLS 445 /WAN to the Fileserver/Network share (IMS/FBMC) entry in Mail Server Integration diagram. ○ Changed IIS Web Server to Web Servers in Interaction Web Tools diagram. ● Removed "Interaction Mobilizer" section as the product has reached End Of Life (EOL).

21-June-2017	Added Interaction Scripter .NET diagram. Interaction Scripter .NET uses HTTP/HTTPS to communicate with scripts hosted on a web server. If scripts are hosted on a network share, it uses SMB TCP 445.
22-June-2017	Updated port diagram for the Interaction Recorder Remote Content Service . The arrow indicating communication between CIC server and Interaction Recorder Remote Content Service (IR RCS) is now bidirectional. As shown, port 8106 and 8107 need to be open from any IR RCS server to CIC server for the purpose of retrieving chat and email recordings.
10-April-2017	<ul style="list-style-type: none"> • Corrected title to "Interactive Update" for diagram in Client operations. • Updated HTTP web browser diagram in Client operations to reflect other CIC client web applications. • Added SMB protocol and ports for Interaction Attendant diagram in Client operations.
27-February-2017	<ul style="list-style-type: none"> • Updated Database and CRM diagram to indicate that the workstation object can represent Scheduled Report Clients and ICBM, if Internet Enabled Reporting is not used. • Divided Interaction Media Server, Interaction SIP Proxy, and Interaction Recorder Remote Content Service into separate sections and diagrams. • Added TCP 8102 and TLS 8103 for voice mail retrieval between CIC and Interaction Media Server in Interaction Edge and Interaction Recorder Remote Content Service
26-January-2017	Corrected errors in the network port for recording retrieval for both Interaction Media Server and Interaction Recorder Remote Content Service in Interaction Recorder Remote Content Service diagram.
21-November-2016	<ul style="list-style-type: none"> • Create a separate port range for Polycom VVX-1500 IP telephones in IP Phone Operations. • COREWEBIC-1533 CIC Port Maps technical reference lists wrong ports for Interaction Connect - Corrected ports and protocols for Interaction Connect in Client operations.
24-August-2016	<ul style="list-style-type: none"> • Fixed errors in ports and protocol for Microsoft IIS and SOAP communications in Database and CRM. • DP-1859 - Interaction Recorder - HTTPs Support for Export, Playback and Archiving - Added ports 8106 and 8107 for Interaction Recorder Remote Content Service recording retrieval in Interaction Recorder Remote Content Service.
15-June-2016	IC-138212 - Corrected incorrect port number for HP ILO in Monitoring and Management .
22-April-2016	<ul style="list-style-type: none"> • Corrected erroneous instances of Session Manager to be monodirectional to the CIC server. • Modified instances of Notifier to be monodirectional. • Fixed incorrect labeling of port 3952 to use "Session Manager". • Fixed an error where a Session Manager connection for port 3952 included UDP as a protocol. • In the Interaction Dialer section, fixed an error where the DialerTranServer protocol extended to the Database server object instead of the Central campaign server object.
26-January-2016	<ul style="list-style-type: none"> • Updated "Copyright and trademark information" page. • IC-135118 Port 6235 needs added to th port map document • Added port 6235 /WAN for all Notifier connections in diagrams.

10-November-2015	Added Session Manager ION and relevant ports to IC Business Manager diagram in Client operations .
20-October-2015	<ul style="list-style-type: none"> • Updated cover page to reflect corporate rebranding. • Updated "Copyright and trademark information" page. • Recreated all diagrams to reflect corporate rebranding and to reduce complexity.
06-July-2015	Corrected "CaaS" and "TSRA" labeling errors in Single Sign-On map.
20-March-2015	Added Interaction Media Server Port Range to Interaction Media Server map.
10-March-2015	<ul style="list-style-type: none"> • Created separate port map for "Audiocodes Ports" • Corrected the Client operations port map. • Updated the IP Phone Operations diagram.
13-February-2015	Restored searchable diagrams and made minor updates.
28-November-2014	Corrected pagination and cleaned up some formatting issues.
06-November-2014	Updated documentation to reflect changes required in the transition from version 4.0 SU# to CIC 2015 R1, such as updates to product version numbers, system requirements, installation procedures, references to PureConnect Product Information site URLs, and copyright and trademark information.
19-September-2014	<ul style="list-style-type: none"> • Added Appliance Monitor SNMP TCP 8096 /WAN and SNMP TLS 097/WAN between CIC Servers and Appliance Monitor Server in the Monitoring and Management diagram. • In Text-To-Speech using Media Resource Control Protocol (MRCP) and Text-To-Speech using Speech Application Program Interface (SAPI) maps: <ul style="list-style-type: none"> ◦ Removed port ranges for third-party product using dynamic port ranges. ◦ Removed ports 8088 and 8089 between Media Server and CIC Server.
28-May-2014	<ul style="list-style-type: none"> • Monitoring and Management - Changed the Switchover diagram to add UDP 8888 /WAN connection between the Primary CIC Server and Backup CIC Server. • Single Sign-On - Added diagrams for single sign-on using a customer-provided ADFS server or a cloud identify provider. • Interaction Dialer - Removed redundant connections for Session Manager between CIC Servers and Central Campaign Servers. • Client operations - Interaction Center Business Manager - Added TCP 8106 /WAN connection between CIC Servers and IRRCS. • Added acronyms for Terminal Services Remote Application (TSRA) and Active Directory Federation Services (ADFS) in Introduction.
02-April-2014	<ul style="list-style-type: none"> • Added Interaction SIP Bridge with port identifier HTTP TCP 8078 or HTTPS TCP 8079 /WAN in the SIP Communication diagram. • Changed the name of Polycom IP Phone/ISS to IP Phone throughout the document. • Changed the name of Screen Recorder Servers to Remote Content Servers in Monitoring and Management diagram. • Replaced the Exchange and Active Directory diagram with the Mail Server Integration diagram.
